

Mark E. Fuller, Ph.D.

Curriculum Vitæ

Education

- 2019 **Doctor of Philosophy, Chemical and Biochemical Engineering**, *Brown University*, Providence, RI USA.
- Dissertation: "Design and Construction of a Shock Tube Facility for Investigations of Nitrogenated Fuel Additives"
 - Member of Prof. C. F. Goldsmith's research group
 - Experimental and computational investigations of chemical reactions and kinetics relevant to combustion processes
 - Focus on combustion chemistry of nitrogenated fuel additives and associated processes:
 - Experimental investigation into pyrolysis and dissociation of nitrite and nitrate compounds
 - Experimental investigation into reactivity enhancement using isopropyl nitrate as dopant
 - Computational modeling of HONO/HNO₂ and interactions with fuel molecules and fragments
 - Design and construction of diaphragmless shock tube for experimental research
- 2015 **Master of Science, Chemical and Biochemical Engineering**, *Brown University*, Providence, RI USA.
- Member of Prof. C. F. Goldsmith's research group
 - Coursework in chemical kinetics, thermodynamics, quantum mechanics, statistical mechanics, physical chemistry, heat and mass transfer, numerical solution of partial differential equations
- 2011 **Master of Science, Mechanical Engineering**, *Cornell University*, Ithaca, NY USA.
- Studied combustion and emissions of solid biomass particles under Profs. Frederick Gouldin and Elizabeth Fisher
 - Additional work in study of microgravity combustion of single fuel droplets under Prof. C.T. Avedisian

1/7

- 2009 **Bachelor of Science, Engineering**, *Brown University*, Providence, RI USA.
- Majored in Mechanical Engineering: Energy Conversion and Fluid and Thermal Systems
 - Also completed all courses for Aerospace Applications and Engineering Mechanics programs in Mechanical Engineering
 - Graduated Magna Cum Laude and elected to Tau Beta Pi, Sigma Xi, and Phi Beta Kappa
 - Additional coursework in German Studies and Public Policy

Experience

- 2019–2021 **Postdoctoral Researcher**, *RWTH Aachen University*, Aachen, Germany.
- Physico-Chemical Fundamentals of Combustion (PCFC) Group under Prof. Alex Heufer
 - Research lead for nitrogen combustion chemistry
 - Experimental investigation and kinetic mechanism development for bio- and renewable liquid transportation fuels
 - Ignition delay studies in both shock tubes and rapid compression machines
 - Mechanical design and testing of a high-pressure diaphragmless shock tube valve
- 2018 **Guest Researcher**, *Institut de Combustion Aérothermique Réactivité et Environnement*, Orléans, France.
- Performed shock tube ignition delay studies on effect of isopropyl nitrate as dopant in propane combustion under Dr. Nabiha Chaumeix
 - Ignition delay results are applied to modeling efforts for engine performance and chemical kinetic mechanism development and evaluation
 - Additional ethanol-air ignition delay studies conducted in support of the Rapid Compression Machine Workshop 2nd Characterization Initiative
- 2016 **Guest Graduate Appointment**, *Argonne National Laboratory*, Lemont, IL USA.
- Performed shock tube studies of propyl nitrite pyrolysis under Dr. Robert S. Tranter
 - Captured data on time-history of reaction using laser schlieren densitometry
 - Developed model for decomposition and fit rate constant for initial dissociation of propyl nitrite
- 2014–2019 **Adjunct Lecturer and Teaching Assistant**, *Brown University*, Providence, RI USA.
- Instructor for senior design course ENGN 1720: Design of Thermal Engines (2014–2018)
 - Additional role as teaching assistant for ENGN 1700: Jet Engines and Aerospace Propulsion (2014, 2016–2018) and ENGN 0720: Thermodynamics (2019)

2/7

- 2011–2014 **Mechanical Engineer**, *Naval Undersea Warfare Center*, Newport, RI USA.
- Member of Propulsion and Energy Branch for Autonomous and Unmanned Systems
 - Testing and computer modeling of fuel cell and battery systems
 - Development of vehicle sizing analyses
 - Oxygen/Hydrogen Hazards Analysis Team - review and approve safety of test assemblies and experimental uses of oxygen and hydrogen
 - Information Assurance Work Force - Linux administrator
 - Radiation Safety Officer for Division Newport

Technical Skills

Data Collection and Analysis	LabVIEW, Arduino, Raspberry Pi	<i>Construction of data acquisition systems including hardware integration and software logging both with commercial systems and custom construction</i>
Scientific Programming	Git, Python, Fortran, Matlab/Octave	<i>Competent in scientific programming and scripting for analysis, simulation, and modeling; version-control and managed software development</i>
Mechanical Design	3-D CAD, Solidworks, Comsol; Machine operation	<i>Ability to design and analyze mechanical and laboratory apparatus; experienced in machine operation and fabrication - CNC mill, lathe, welding</i>
Documentation	L ^A T _E X, LibreOffice, MS Office	<i>Significant experience in developing written documentation and presentations in both industrial and academic settings including refereed journal articles, technical reports, posters, and slide presentations</i>

Languages

English	Native	
German	Near-Native	<i>Six semesters of formal study at university level, residence in Germany since 2019</i>
Spanish	Good Command	<i>Six years of primary and secondary school study</i>
French	Basic Competence	<i>Independent study and guest research conducted in France</i>
Hebrew	Basic Competence	<i>Independent study and Jewish education</i>

Professional and Research Community Service

- Reviewer for Combustion and Flame
- Reviewer for Proceedings of the Combustion Institute
- Reviewer for Energy Conversion and Management

3/7

- Contributing developer to the REACTION MECHANISM GENERATOR, AUTOMATIC RATE CALCULATOR, and THE TANDEM TOOL for automated computational chemistry and mechanism development, organized under the Green Research Group at MIT
- Member of the THEORETICAL CHEMICAL KINETICS DATABASE organized under the Dana Research Group at the Technion
- Active in formatting and publication of experimental data in CHEMKED format for open-access and handling and manipulation of data files with PYKED open-source software
- Team member maintaining the L^AT_EX MODERN CV package (used to generate this CV)

Professional Memberships

- Combustion Institute: German Section since 2019, Eastern States Section 2014–2019
- Verein Deutscher Ingenieure (VDI)

Awards and Honors

- Elected to membership in Tau Beta Pi, Sigma Xi, and Phi Beta Kappa, 2009
- Recipient of the Joseph Kestin Award of Excellence as top graduating engineering student at Brown University in the field of thermodynamics, 2009
- Winner of the Caesar Misch Prize for excellence as a first-year student in German language study at Brown University, 2006
- Achieved rank of Eagle Scout as member of the Boy Scouts of America, 2005
- Selected to attend the New Jersey Governor's School on Public Issues, 2004
